Advanced & Comprehensive

- State of the Art technology
- Awarded Multiple International Patents
- Accounts for the most mediator releasing pathways
- Identifies reactions to both foods and food-chemicals

Accurate & Reliable

- The highest reported accuracy of any food sensitivity blood test
 - Sensitivity: 94.5%
 - Specificity: 92.7%
- Consistently > 90% split sample reproducibility

Functional & Physiologic

- Correlates with proinflammatory and proalgesic mediator release better than any other food sensitivity blood test
